

GTS – Energy Saving Toggle Switch

- ▶ The GTS provides the most inexpensive way to incorporate Bi- Level controls into your project.
 - Hi-Lo controls with the flick of a switch.
 - Instantly create energy savings in gyms with Bi-level switching. Easily install A-B switching in older private offices.
 - Deliver A-B switching with a single switch leg.
 - Old office, single switch leg = Out of date
 - Old office with GTS = Code compliant A-B switching.
- ▶ Ease of Implementation
 - Order pre-installed in any P2 fixture.
 - Use with a single step-dim ballast, or create AB switching in fixtures with two ballasts.
 - Purchase with kits for instant Hi-Lo controls.
 - No complicated wiring to deal with.
 - Installs into existing fixtures with two screws.
- ▶ Our Experience
 - Re-lighting project managers desire simple and effective solutions.
 - The GTS was developed by P2 in response to a need for inexpensive Hi-Lo controls.
 - We've been focused on nothing but supporting energy efficient re-lighting projects since 1992. Hit a dead end? Give our application support team a try.
